

AFRIGEL OUEST S.A.

# Your Solution Partner.

# Refrigeration

## Cold Store Solutions

Being a leader in cold store solutions since 1946, "Farjallah Group" has been at the forefront of delivering reliability to businesses in the Middle East and West Africa. With over 75 years of experience, we specialize in designing, supplying, and installing cutting-edge cold stores that ensure optimal temperature and storage efficiency. Our commitment to customer satisfaction has made us the trusted choice for businesses seeking reliable cold room solutions.

## ICEBERG

### Refrigeration Equipments

Wide range of domestic and commercial refrigeration solutions for any application, with a unique selection of components, combined with our reliable and high-efficiency industrial special package systems. Our products are designed to provide superior energy savings and reliability, while ensuring optimal performance.

## BITZER

### Compressors

BITZER compressors in the field of commercial refrigeration allow for fresh produce all year round, regardless of the temperature outside.

## COPELAND

### Compressors

Copeland's unique patented design, lowest sound, and highest efficiency makes it the most durable compressor available on the market.

## KINGSPAN

### Insulated Panels

Fire Safe Wall and ceiling system suitable for all types of building below OC temperature. Trapezoidal form roof system a standard for all building application.

## MTH

### Cold Storage Doors

FTC has the reputation for producing the most reliable custom made cold stores doors, using exclusively, MTH Italian parts & accessories.

## BOXCOLD

### Modular Coldrooms

Boxcold offers reliable high-quality products that meet various global market needs. This is possible by using modern, eco-friendly technologies.

## FRIGA-BOHN

### Evaporators HeatCraft

Evaporators & refrigeration equipment for low & medium temperature application.

## GENEGLANCE

### Ice Generators

These ice generators have to be connected to an existing refrigeration system. The generators capacity varies from 500 kg to 50 tons/day.

## DANFOSS

### Refrigeration Accessories & Equipment

Pressure and temperature regulating valves for Commercial and Industrial Refrigeration Application.

# Mechanical Contracting

## Harp Refrigerant

Made in UK, Harp International offers its own HARP® brand of halocarbon and flammable hydrocarbon refrigerants.

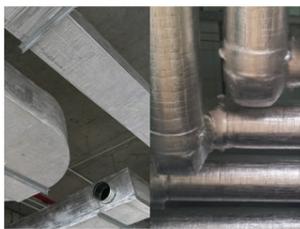

## Copper Pipes, Rolls & Fittings

Copper tubes and fittings for heating, refrigeration, air conditioning, natural gas, water supply and industrial use.

## ISOPIPE Thermal Insulation

Closed cell synthetic rubber elastomeric foam thermal insulation.

## THERMOBREAK Thermal Insulation

“All in one” flexible thermal insulation made from physically crosslinked closed cell polyolefin foam for duct, pipe, tank, under slab, raised floor, wall and roof insulation.

## UNIWELD Refrigeration Accessories

Vacuum pumps, Welding torches, Pressure gauges.

## SUPCO Refrigeration Accessories

Temperature and humidity logger, Infrared thermometer, Capacitors.

## PROMAT Fire Protection

Steel protection, smoke barrier, fire resistant ceilings, ventilation & smoke extraction.

# Warehousing Solutions

## STOW Storage Solutions

As a leader in the warehouse equipment field, our aim is to develop static and automated storage solutions, for palletized goods, medium and small items.

## LOADING SYSTEMS Dock Equipment & Industrial Doors

Complete program of products and services for loading and unloading: Dock Leveller, Dock Shelter, Sectional Doors and accessories.

## DYNACO High Performance Doors

A leader in the industry: Reliable, maintenance friendly and safe high speed roll up doors, designed to operate 24/7 under intensive use and extreme conditions.

## Insulated Panels

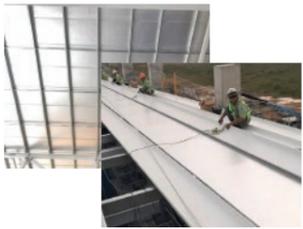

### Roof & Wall Panels

The roof & Wall panel system offers exceptional thermal insulation and fire resistance, suitable for various construction needs. It is eco-friendly, durable, and adaptable, aligning with modern sustainable building practices and ensuring efficient, safe building designs.

### Façade panels

The facade sandwich panel system features excellent thermal insulation and wind resistance, suitable for various building types. Available in multiple thicknesses, it offers easy installation, fire resistance, and eco-friendly properties, ideal for enhancing facades with efficiency and aesthetic appeal.

### THERMOBREAK

#### Solar Block

Insulation for buildings, combining fire resistance, ASTM compliance, and enhanced thermal performance. Its design includes crosslinked polyolefin foam and reinforced aluminum foil, ensuring effective heat reflection, energy efficiency, and environmental friendliness.

### KINGSPAN

#### Light & Air

Solution for integrating smoke extraction system and sky light system, it combines safety with energy efficiency through improved air management and illumination.

## Air Conditioning

### FDX Rooftop Unit

Industrial rooftop air conditioners provide energy-efficient cooling, advanced IoT technology for optimal performance, and flexible, leak-proof installation compatible with building management systems.

### Close Control Unit

The close control units feature advanced cooling technologies with varying capacities and precise temperature control, ensuring optimal performance and reliability in critical environments like data centers, all within a compact, efficient design.

### Industrial Dehumidifiers

Industrial dehumidifiers offer efficient moisture control with cost-effectiveness, ideal for varied industrial applications needing stable, low dew point environments.

## Air Handling

### Fabric Ducts

Textile ducts offer a cost-effective solution for efficient air distribution. Their unique design prevents condensation, reducing the risk of moisture-related issues. This not only ensures a comfortable indoor environment but also minimizes maintenance and operating costs, making textile ducts an economical choice for climate control systems.
